- PortWatch
- Pocket Printing
- Form Display
- TextArt Shape Interaction
- Label Comparison Tool
- Database Queries
- Form Designer
- Form Viewer
- 25 Support Languages

CODESOFT Changes and Grows with Your Business

What if we need to create more complex labels? CODESOFT is an advanced label design application that gives you the ability to easily design a label, connect it to a database, or add complex barcodes such as HIBC or GS Databar using CODESOFT's intuitive interface.

What if our processes change? With CODESOFT's flexibility, you can easily integrate label printing and RFID technology into existing and new business processes, increasing both efficiency and control. Adding CODESOFT to business processes and training new personnel is simple with its intelligent interface, helpful wizards, and simple database connections.

What if we change printer manufacturers? CODESOFT supports over 2,500 industry-leading label printers and nearly any other printer where a Windows driver exists. TEKLYNX drivers are developed directly with each printer manufacturer to ensure true WYSIWYG (What You See Is What You Get), from onscreen design to the printed label.

What if our business grows? The expandability provided by other TEKLYNX enterprise applications enables CODESOFT to smoothly integrate into any level of enterprise solution as your business grows to require automated label printing, label approval, and secure label storage.
